### HERO SECTION

**Headline:** Clarity. Scale. Speed.

**Subheadline:** The intelligent video platform that transforms how you hire, evaluate, and hear from the people who matter most.

**Body:** Vidmagin brings together asynchronous video and AI-powered assessment into one unified platform — so you spend less time scheduling and more time deciding.

**CTA Buttons:**

- Explore the Platform
  - Talk to Us
- 

### PLATFORM OVERVIEW SECTION

**Section Label:** The Vidmagin Platform

**Headline:** Two Engines. Four Products. One Platform.

**Body:** Vidmagin runs on two intelligent cores — the **Async Video Hub** for capturing authentic human responses, and the **Intelligent Assessment Engine** for scoring, ranking, and surfacing the right people, fast.

---

### Product Cards (4)

**1. Async Video Interview** Stop chasing calendars. Let candidates record thoughtful responses on their schedule — and let AI surface the best ones on yours. → *For: Hiring teams, recruiters, HR*

**2. Customer Feedback Portal** Your happiest customers have a story to tell. Give them a quiet, simple way to tell it — and receive a ready-to-publish video in under 20 minutes. → *For: Marketing, Sales, Customer Success*

**3. Candidate Prescreening Module** Three intelligent layers — resume fit, question analysis, and a one-minute video — reveal not just if a candidate matches, but why. → *For: High-volume hiring, talent teams*

**4. Startup Application Filtering** Screen 100+ startups in hours, not weeks. Our AI evaluates founder pitch videos, scores applications against your thesis, and delivers a qualified shortlist — ready for partner review. → *For: VCs, Angel Investors, Accelerators, Corporate Ventures*

---

## WHY VIDMAGIN SECTION

**Headline:** Built for decisions, not just data.

**Body:** Most tools give you information. Vidmagin gives you insight.

We don't just collect responses — we decode them. Our platform is built around one belief: the best decisions come from clarity, and clarity comes from seeing the person behind the profile.

Whether you're evaluating a candidate, a founder, or a customer, Vidmagin gives you the depth to decide with confidence — at speed, at scale.

### 3 Pillars:

- **Clarity** — Know not just *if* someone fits, but *why* they do.
  - **Scale** — Process hundreds of applications or responses without losing the human signal.
  - **Speed** — Cut scheduling, eliminate back-and-forth, and move from evaluation to decision faster than ever.
- 

## SOCIAL PROOF / STATS SECTION

- **70% faster** progression from screening to term sheet
  - **80% reduction** in time-to-shortlist
  - **20 minutes** is all it takes for a customer to share their story
  - **Zero scheduling** required — for any of it
- 

## FINAL CTA SECTION

**Headline:** Ready to see people, not just profiles?

**Body:** Whether you're hiring, investing, or building trust with customers — Vidmagin gives you the clearest view of the people behind every application, resume, or testimonial.

**CTA:** Get Started → [Sales@vidmagin.com](mailto:Sales@vidmagin.com) | +91 9585587990

---

---

---

## HERO

**Headline:** The Interview That Finds Its Moment.

**Subheadline:** Stop scheduling. Start discovering.

**Body:** You have a role to fill. They have a story to tell. But calendars fight. Schedules pile up. Good candidates slip away while you're still hunting for a slot.

What if the interview didn't need a time slot at all?

---

## THE PROBLEM

**Headline:** The delay starts here.

**Body:** Interviews get pushed. Feedback stalls. The wrong hire becomes a risk — not because you lacked candidates, but because the process slowed everything down.

Every day spent finding a meeting slot is a day a great candidate might accept somewhere else.

---

## WHAT IT IS

**Headline:** Where readiness meets insight.

**Body:** Vidmagin's Async Video Interview is an asynchronous, video-based platform that captures authentic candidate responses — on their schedule, reviewed on yours.

Not a squeezed-in call. A dedicated space. Quiet. Focused. Theirs. Where a candidate can present their complete capability without the pressure of being put on the spot.

---

## HOW IT WORKS

**Step 1 — You ask what matters.** Move beyond the standard. Ask about the project saved by initiative, not just instruction. Ask about growth born from setback. You set the stage for genuine insight.

**Step 2 — You invite, and let them prepare.** Send a single link — valid for days, not weeks. It's not an open-ended task; it's a clear, respectful window. Candidates reflect, gather their examples, find their focus. When they're ready, composed and clear, they begin. On their time. Within your timeline.

**Step 3 — You discover, on your schedule.** When they submit, the interview arrives — structured, authentic, and ready for review. Watch with your team. Share with a click. Compare responses seamlessly.

You don't just scan a resume. You witness their presence. You assess their clarity. You meet the professional behind the profile — before you coordinate a single live call.

---

## AI-POWERED INTELLIGENCE

**Headline:** Less time watching. More time deciding.

**Body:** Our AI-powered analysis provides validated scores and justification — highlighting key strengths and alignments so your team can focus where it matters most: choosing the right person.

---

## WHY IT WORKS

The best answers come from reflection, not rushing. The right hire is often found in the depth of a thoughtful response — not the chaos of a crammed diary.

---

## KEY BENEFITS

- **Eliminate scheduling chaos** — No back-and-forth. No calendar conflicts.
  - **Authentic insight** — Candidates are composed, prepared, and genuine.
  - **Decisive speed** — AI-assisted scoring accelerates your review.
  - **Forward progress** — Your process never stalls waiting for a slot.
  - **Remote-ready** — Hire across time zones without coordination overhead.
- 

## WHERE IT'S USED

- High-volume hiring where multiple candidates need fast screening
  - First-round evaluation to reduce the burden on live interviews
  - Remote and distributed hiring teams operating across time zones
- 

## CTA

**Stop chasing calendars. Start meeting candidates. → Get Started**

---

---

### HERO

**Headline:** People at ease speak from the heart.

**Subheadline:** A quiet, simple way for your happy customers to tell their story — in under 20 minutes.

**Body:** No studio. No crew. No nervousness. Just them, their thoughts, and a clean, ready-to-use video that's yours the moment they're done.

---

### THE PROBLEM

**Headline:** Your best marketing is already out there. You just haven't captured it yet.

**Body:** Your customers believe in your work. They've seen the results. They have the words. But asking for a video testimonial usually means complicated logistics, awkward scheduling, and a process that feels like a production — so it never happens.

Vidmagin changes that.

---

### HOW IT WORKS

**Step 1 — Find your storytellers.** Create your list of customers. Add them one by one, or upload them all at once. These are the people who believe in your work — and you're simply giving them a place to say so.

**Step 2 — Ask what you need to hear.** Design your own set of questions. Ask about the moment they knew it worked, or what surprised them most. Build your question set once and use it for every customer whose truth you want to capture.

**Step 3 — Let them prepare.** Send the questions ahead of time. They can think, gather their thoughts, and respond when they're comfortable. The link is valid for a set number of days — no pressure, no rush.

**Step 4 — They record in their own space.** No lights. No crew. Just them and a simple guide. If they need a break, they can pause. If they want to try again, they can retake. This is their story. They tell it their way. Most times, it takes less than twenty minutes.

**Step 5 — You get a clean, ready-to-use video.** No editing. No waiting. No complicated software. The moment they finish, you receive a clean MP4 file — ready for your website, your social media, or your sales team.

---

## WHY USE IT

- **No studio required** — people speak more authentically from their own comfort zone
  - **20-minute total investment** — for professional-quality, usable testimonials
  - **Genuine customer voice** — not rehearsed marketing speak
  - **Ready to publish** — clean MP4 output, instantly available
- 

## WHERE IT'S USED

- Website testimonial sections and social proof pages
  - Sales enablement — share real customer success stories with prospects
  - Marketing campaigns that need authentic, human narratives
- 

## CTA

**It's that simple. No fuss. No strain. Just the real voice of your customer.** → Start Collecting Testimonials

---

---

## PAGE: CANDIDATE PRESCREENING MODULE

---

### HERO

**Headline:** We Don't Just Read Between the Lines. We Decode the Person Behind It.

**Subheadline:** Three Layers. One Truth. Because a resume is only the beginning.

**Body:** Finding the right person takes more than a quick keyword scan. It takes clarity, depth, and a human signal — before the interview even begins.

---

### WHAT IT IS

**Headline:** Three-layer intelligent filtering that goes beyond the resume.

**Body:** Most platforms scan keywords and match dates. Vidmagin goes deeper. Our Candidate Prescreening Module runs every applicant through three intelligent layers — uncovering not just whether someone fits, but *why* they do.

---

## THE THREE LAYERS

### Layer 1 — Decoding the Fit *The resume meets the role.*

It starts with the resume and the job description. We map real potential — strengths, genuine expertise, and meaningful gaps. We don't just flag a match. We show you the reasoning behind it.

### Layer 2 — Decoding the Details *The answers meet your expectations.*

Yes, we ask the questions everyone asks. But what we do with the answers is what sets us apart. Our proprietary rule engine doesn't just collect responses — it analyzes them. It measures each answer against what you value most, instantly surfacing candidates who align not just with the role, but with your reality.

The best candidate isn't always the one with the perfect resume. Often, it's the one whose expectations align with yours — on terms that go beyond the skillset.

### Layer 3 — Decoding the Person *The human behind the profile.*

A resume can't show you confidence. A questionnaire can't capture presence. That's why we built the one-minute video response — a feature that gives you your earliest handshake with every candidate, before you schedule a single call.

You hear their voice. You see their thinking. You feel their fit.

---

## WHY USE IT

- **Clarity** — Understand why a candidate matches, not just if they do
  - **Depth** — Measure expectations alignment beyond the skillset
  - **Human connection** — Video reveals confidence and fit before the first live conversation
- 

## WHERE IT'S USED

- Mid to high-volume hiring workflows
  - Reducing interviewer time by screening with precision
  - Identifying the best-fit candidates from large applicant pools
- 

## CTA

**See beyond the paper. Meet the person.** → [Explore Prescreening](#)

---

## PAGE: STARTUP APPLICATION FILTERING

---

### HERO

**Headline:** The Intelligent Front-End for Your Deal Flow.

**Subheadline:** Screen 100+ startups in hours, not weeks. Backed by objective criteria, AI-driven founder analysis, and your fund's own thesis.

**Body:** VCs, Angels, and Accelerators spend 70% of their fund life on administrative triage — reading mismatched decks, manually scoring answers, and guessing founder potential. Vidmagin ends that.

---

### THE PROBLEM

**Headline:** Your inbox isn't a pipeline. It's a funnel that leaks.

**Body:** You want to invest in deep tech with defensible IP, climate solutions with unit economics, and founders with real grit.

But you're forced to wade through 50 "AI-powered" food delivery apps, 30 pitch decks that mistake a mission for a business model, and 100 generic answers that look like they were copied from ChatGPT.

The math is brutal: 500+ applications per cycle. 80% don't fit your thesis. 40+ hours wasted confirming what you already suspected.

---

### WHAT IT IS

**Headline:** Powered by the Intelligent Assessment Engine.

**Body:** Vidmagin transforms scattered startup applications into unified, comparable insight — with objective, algorithmic scoring tailored to your fund's DNA.

---

### HOW IT WORKS

**Configure** Design weighted criteria that match your investment thesis. Set the rules once — Vidmagin applies them consistently across every application.

**Collect** Standardized metrics, structured answers, complete pitch deck data — and a 90-second founder video recorded at the time of application.

**Score** Our AI analyzes clarity, urgency, authenticity, and alignment — instantly surfacing the founders worth your time.

**Decide** Unified profiles with side-by-side comparison and collaborative notes. Your team aligns faster. Your shortlist arrives sooner.

---

## THE THREE-LAYER FILTER

**The Context Layer — Decoding the Non-Negotiables** Analyzes the pitch deck and team background against your hard requirements: sector, stage, traction. Instantly validates who is fundamentally qualified.

**The Logic Layer — Decoding the Negotiables** Our proprietary rules engine evaluates structured answers on business model, market size, and unit economics — surfacing alignment on strategic fit and valuation expectations.

**Predictive Potential — Decoding the Founder** AI-driven analysis of the mandatory 90-second video pitch. Reveals communication, presence, conviction, and passion — the earliest possible signal of founder quality.

---

## THE GAME CHANGER: SMART RETRIEVAL

**Headline:** Ask your deal flow in plain English.

**Body:** With ChatGPT-style smart retrieval, your entire application database becomes instantly searchable — in natural language.

*"Show me all SaaS startups that scored above 90% on the founder video pitch." "Find founders who mentioned Generative AI and have a technical co-founder." "Retrieve the top 5 applications for Climate Tech."*

Every data point, answer, and video insight — instantly accessible. Never lose a deal again.

---

## WHY USE IT

- **Speed** — 80% reduction in time-to-shortlist. See your top 10 startups before your coffee gets cold.
  - **Depth** — We don't just scan keywords. We analyze the founder (video) and the business (scoring).
  - **Memory** — Smart retrieval means the best deal you saw three months ago is one query away.
  - **70% faster** progression from screening to term sheet.
-

## WHERE IT'S USED

- **VCs and Angel Investors** — Validate founder-market fit at scale
  - **Accelerators** — Curate cohorts with strategic alignment and consistency
  - **Corporate Ventures** — Identify outliers that match your innovation goals
- 

## CTA

**Stop reading bad decks. Start meeting the right founders.** → [Request a Demo](#)

## PAGE: ABOUT

---

### HEADLINE

Built to see people clearly.

### BODY

Vidmagin was built on a simple belief: the most important decisions — who to hire, who to fund, who to trust — should be made with as much clarity as possible.

Too many evaluation processes reduce people to keywords, checkboxes, and scheduled slots. We built something different: a platform that captures authentic human signal — through video, AI, and intelligent design — and delivers the insight you need to act with confidence.

We serve two kinds of problems:

The **hiring problem** — where great candidates get lost in scheduling chaos, and great teams get overwhelmed by volume.

The **signal problem** — where the data exists, but the meaning behind it doesn't surface until it's too late.

Vidmagin solves both.

Our platform combines an **Async Video Hub** for capturing real, unscripted human responses — and an **Intelligent Assessment Engine** that scores, ranks, and filters at scale without losing the human in the process.

We believe the right hire, the right founder, and the right customer story are already out there. Vidmagin just helps you find them faster, and understand them better.

**Our values:**

- Clarity over noise
  - Scale without sacrifice
  - Speed with depth
  - People, always first
-

## SEO META DESCRIPTIONS (Per Page)

**Home:** Vidmagin is the intelligent video platform for hiring, startup evaluation, and customer feedback — powered by async video and AI-driven assessment.

**Async Video Interview:** Stop scheduling interviews. Vidmagin's async video interview platform lets candidates respond on their schedule while AI surfaces the best ones for your team.

**Customer Feedback Portal:** Capture authentic video testimonials from customers in under 20 minutes. No studio, no editing — just a clean MP4 ready to publish.

**Candidate Prescreening:** Three-layer intelligent candidate screening — resume fit, question analysis, and one-minute video — reveals the right hire before the first interview.

**Startup Application Filtering:** Screen 100+ startups in hours with AI-powered scoring, founder video analysis, and smart retrieval. Built for VCs, angels, and accelerators.

**About:** Vidmagin is built to bring clarity, scale, and speed to the most important evaluations — hiring, investment, and customer trust.
